DD/S&T 877-66

MEMORANDUM FOR: Executive Director-Comptroller
SUBJECT: Review of DD/S&T Publications
REFERENCE: Memorandum for DD/S&T from Executive
Director-Comptroller, dated 7 February
1966, [redacted]

25X1

1. Attached are the results of the survey conducted by this Directorate on its scientific and technical publications. In response to your request, we have provided estimates of editorial and printing costs in man-hours and money for the publication of the finished intelligence product of the Office of Scientific Intelligence, the Office of Elint, and the Foreign Missile and Space Analysis Center. We have also included a brief description of each of the Office publications together with the distribution lists.

2. We have analyzed the publication program of this Directorate to identify any areas of undesirable or unnecessary duplication. We note that there is minor duplication in reporting between the OSI Surveyor and FMSAC's Missile and Space Summary arising from the recent reorganization which moved OSI's Ballistic Missile and Space Division into FMSAC. However, this is a matter which is being solved within the Directorate. We have identified no basic changes in our publications policy which could result in a significant saving in manpower or money without sacrificing speed, quality, or security of product.

3. We emphasize that the conclusions noted above are preliminary and are based only on an analysis of duplication within this Directorate. We will be pleased to participate in any inter-Directorate publication review which you may wish to undertake.
